

GEGL Crayon Text properties

Operation name (lb:crayon)

Description: Give your text the appearance of a crayon drawing or hand drawn text with this plugin. Try using a semi bond font that resemble human hand drawings with this for the most interesting results. This plugin probably won't work at all with very thin fonts.

Properties

spread:

A noise spread distortion operation to create a crayon effect on the drawing

intensity:

Control the intensity of the crayon text. Lower values increase the intensity. Higher values will make the crayon text even more thin. Use high values on very bold fonts and low values on normal size fonts.

color:

Color of the drawn text
